

Grow Your Future with Nutrien.

New Grad Technology Program

Geared toward new grads interested in growing a career in technology, this program offers successful candidates valuable hands-on experience while working full-time. The two-year program includes rotations through several technology-related areas of our business.

Not sure whether your degree or experience is a fit? Our Campus Outreach Team is available to answer your questions. Drop us a line at campus@nutrien.com.

Why apply?

As a global leader in agriculture, we are investing in innovation and technology to make the industry more efficient, safe, and sustainable. Our program will give you meaningful experiences modernizing processes with technology and experiencing firsthand how digital is a game-changer for transforming business, including:

- Career development with a global company
- Opportunity to gain real-world, hands-on experience in technology and digital transformation
- Senior leader mentorship support throughout the program
- Valuable networking opportunities
- Competitive salary and benefits

Who can apply?

New graduates interested in a career in technology are eligible to apply with a four-year degree; a specialized technology degree or industry experience are not mandatory. We are looking for creative thinkers and problem solvers who have a passion for technology and the role it plays in business strategy.

During your time in the program, you will have dynamic experiences in:

Data

Hands on experience with data management, data tools, Artificial Intelligence, Machine Learning, data analysis and how to use data for decision making

Digital Delivery

Introduction to customer experience, design thinking, development techniques and methods, stakeholder management and delivering outcomes with value

Enterprise Applications

Practical experience in serving business customers in the design, build, sourcing and maintenance of critical applications to run a global enterprise

Cybersecurity

Assist in the awareness of protecting our digital assets, learning about phishing and tools and techniques used to help a global organization stay cyber safe

Strategy & Planning

Exposure to the financial/budgeting side of a functional department, learning also about strategy, project management, change management and vendor management
